Great Britain

The United Kingdom of Great Britain and Northern Ireland is situated on the British Isles. It consists of four parts: England, Wales, Scotland and Northern Ireland. England, Wales and Scotland occupy the territory of Great Britain. Northern Ireland is situated in the northern part of Ireland. The territory of the United Kingdom is about 244 square kilometres. It is the 75th place among other countries in the world. The population is over 55 million. About 80% of the population is urban. The capital of the country is London.

The surface of Great Britain varies greatly. The northern and western part of the country is mountains and is called the Highlands. All the rest (south, east and centre) is a vast plain which is called the Lowlands. The mountains are not very high. The rivers are not long. The most important of them are the Severn and the Thames. There are many beautiful lakes in the mountainous parts of the country. The mountains, the Atlantic Ocean and the warm waters of the Gulf Stream influence the climate of Great Britain.

Great Britain is a highly developed industrial country. It is known as one of the world's largest producers and exporters of iron and steel products, machinery and electronics, chemicals and textile, aircraft and navigation equipment. One of the chief industries of the country is shipbuilding.

Great Britain is a country with old cultural traditions and customs. The most famous educational centres are Oxford and Cambridge universities. They are considered to be the intellectual centres of Europe. The education is not free, it is very expensive.

The United Kingdom is a monarchy and the Queen is the head of state. But in practice it is ruled by the elected government with a Prime Minister at the head. The British Parliament consists of two chambers: the House of Lords and the House of Commons. There are three main political parties in Great Britain: the Labour, the Conservative and the Liberal parties, The Conservative party is the ruling party nowadays.

Вариант 2

Great Britain

Great Britain is situated on the British Isles. It consists of England, Wales, Scotland and Northern Ireland, and is one thirtieth the size of Europe. Great Britain is surrounded by seas on all sides and is separated from the continent by the North Sea and the English Channel.

There are many rivers in Britain. They are not long but some of them are deep. The longest river is the Severn. There are many mountains in the north of England and in Scotland but they are not very high. The highest mountain in Great Britain is Ben Nevis. The most beautiful is Loch Lomond.

Great Britain has a very good position as it lies on the crossways of the sea routes from Europe to the other parts of the world. There are many countries which are connected with Great Britain by sea. Thanks to Gulf Stream the climate of Great Britain is mild. It is often foggy and rainy. The summer is not very hot and the winter is not very cold.

Great Britain is a highly developed industrial country. It lives by manufacture and trade. Its agriculture provides only half the food it needs, the other half of its food has to be imported. Britain is one of the most highly industrialised countries in the world: for every person employed in agriculture, eleven are employed in mining, manufacturing and building. The main branches of British economy are engineering, mining, ship-building, motor vehicle manufacturing, textile, chemistry, electronics, fishing and food processing. The industrial centres of Great Britain are London, Manchester, Birmingham, Leeds, Liverpool, Sheffield and others.
